

Project FilterShare: Release Plan

Team 16
Release date: 07/29/16
Revision number: 1
Revision date: 07/04/16

High level goals:

- Be able to take/select photos to edit
- Be able to create a custom photo filter
- Be able to save custom filters
- Be able to share filters with other users
- Be able to use shared filters

User stories for release:

- Sprint 1
 - (2) As a social media user, I want to be able to take/select photos so that I can share them with friends.
 - (8) As a photo editor, I want to make a filter so that I can have customized filters.
 - (8) As a photo editor, I want a non-intrusive editing page to create and preview filters.
 - (5) As a software developer, I want an organized backend system so that I can save and retrieve data for filters.
- Sprint 2
 - (8) As a photo editor, I want a non-intrusive editing page to create and preview filters.
 - (3) As a social media user, I want to be able to share filters with other users on the app so that I can contribute to the community.
- Sprint 3
 - (5) As a social media user, I want to be able to find filters other people share so that I can make better photos.

Product backlog:

- Be able to list shared filters in different order: most recent, most popular, my filters, random
- Be able to search uploaded filters by hashtags
- Be able to edit shared filters
- Be able to comment on shared filters
- Be able to see "Most Popular" filters daily, weekly, monthly, or all time
