Sprint 2 Plan

Product name: Filtershare, Filters with friends,
Team name: Team16
Sprint completion date: 07/18/16
Revision number: 1
Revision date: 07/11/16

Goal: Be able to share photos with custom photo filter and apply shared filters.

Tasks:
- As a photo editor, I want a non-intrusive editing page to create and preview filters.
  - Implement filter properties adjustment (5 hours)
  - Implement an adjustble slider with 'Cancel' and 'Done' button (2 hours)
- As a social media user, I want to be able to share filters with other users on the app so that I can contribute to the community.
  - Design share page. (3 hours)
  - Implement API connector between the application and the server in frontend (5 hours)
  - Implement API connector between the application and the server in backend (5 hours)
  - Implement the share page (2 hours)

Team roles:
Jaemin Shin: Product Owner(Frontend Developer)
Hyoungseok Kim: Developer(Frontend Developer)
Greg Biles: Developer(Graphic designer)
Josh Bernfeld: Scrum Master(Backend Developer)
Hyunsung Cho: Developer(Frontend Developer)

Initial task assignment:
Jaemin Shin: "As a social media user, I want to be able to share filters with other users on the app so that I can contribute to the community.", Implement the share page.
Hyoungseok Kim: "As a social media user, I want to be able to share filters with other users on the app so that I can contribute to the community.", Implement API connector between the application and the server in frontend.
Greg Biles: "As a social media user, I want to be able to share filters with other users on the app so that I can contribute to the community.", Design share page.
Josh Bernfeld: "As a software developer, I want an organized backend system so that I can save and retrieve data for filters.", Implement API connector between the application and the server in backend.
Hyunsung Cho: "As a photo editor, I want a non-intrusive editing page to create and preview filters.", Implement filter properties adjustment

Initial burnup chart(Made it using chart in Excel)
